The new T-140 platform is all about maximum fun, wherever you ride. A versatile all-rounder with big-hit capabilities, it combines climbing efficiency with a hooligan attitude to descents, using every bit of its 140mm of suspension travel to keep you grinning from ear to ear.

The T-140 OTO geometry was designed around a shorter 37mm offset fork. The extra front end grip this creates allows us to make the most of the 140mm travel fork, fully exploiting the capabilities of the chassis, the more neutral handling and the 2.6" tyres.

The SR combines our latest geometry and frame tech with RockShox suspension and a Shimano Deore 11 speed drive-train resulting in a massively capable, great value bike.
