We've improved the specification on the new V4 529. Upgrades include a dropper post, SRAM's 12 speed SX Eagle drivetrain with a huge 11-50t cassette and an updated frame with a new workshop-friendly BBX shell with increased axle clearance for easier maintenance.

Our proprietary OTO & SCR technology combine with Whyte Trail Geometry to bring increased balance and control to the 29er trail hardtail category.

A RockShox Recon B Spec fork and the Boost rear dropout, means lots of mud clearance and allows up to a 2.8" tyre to be fitted.
