Our 800 hardtails have always offered a fine blend of fun, control and speed. Our SCR design, with no need for an inner chainring clearance, means our engineers were able to re-shape our custom chainstays for improved agility and a more dynamic ride.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 780mm bar. The 800 series bikes also feature a 120mm travel fork, for trail-bike levels of performance.

This latest generation frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.
