The 802 is available in XS size. All sizes have more compact geometry than the 801 or 805 meaning slightly less top-tube length for a more comfortable reach, suiting riders with shorter proportions.

The 800 Series compact frames use the latest Whyte geometry for confidence-inspiring control. A short stem and wide 760mm bar combine with a 120mm travel fork for trail-bike levels of performance.

The 802 gets a Boost 148mm rear dropout which allows up to a 2.8" tyre to be fitted and provides increased mud clearance for year-round trail riding.
