The 800 Series frame uses the very latest Whyte trail geometry, based around a longer top tube, a short stem and wide 780mm bar, providing exceptional handling, balance and control.

The BBX63 internal cable routing keeps cables clean and clear of grime whatever the conditions, while Whyte's surefooted geometry will make you want to ride come rain or shine. It also allows the rider to easily upgrade to the Whyte Drop.it II dropper post.

WTB STP i27 TCS 2.0 System rims with Maxxis TR front and rear specific tyres combine to make a Tubeless Ready package, with enough grip to fully exploit the super-capable 800 series trail geometry.
