The 806 is available in XS size. All sizes have more compact geometry than the 801 or 805 meaning slightly less top-tube length for a more comfortable reach, suiting riders with shorter proportions.

The 806 uses smooth Shimano Deore shifting, featuring the latest Shadow Plus clutch rear derailleur, combined with a Whyte 2pcs chainset with narrow-wide chain ring for perfect chain control on rough terrain.

WTB STP i27 TCS 2.0 System rims with Maxxis TR front and rear specific tyres combine to make a Tubeless Ready package, with enough grip to fully exploit the super-capable 800 series trail geometry.
